

Cut and glue "A Rolling Die"

Make a paper die for games

1. Cut out the cube template along the dashed line.
2. Bend along the red lines to the uncolored side of the template.
3. Add glue or tape where marked. Glue the vertical ends together, then glue the horizontal ends together in a cube shape.
4. Wait for it to dry.
5. Use the die in games.

Tip:
If you don't have a printer, trace the template onto a blank sheet of paper from your computer screen.
