

Halloween themed garland

1. Print and color, if you like, the triangular parts of the garland on pages 1 and 2.

2. Cut out all parts of the garland.

3. Bend the rectangular part in half along the dotted line.

4. Measure how long you want your garland to be. Add a little extra length for ties or fasteners. Measure and cut the appropriate length of thread, ribbon, or string to hold the garland together.

5. Add glue or tape where marked. Thread the thread through. Glue.

6. Wait for it to dry.

7. After drying, the garland is ready. Decorate the room!

Note: For the garland, you will need a thread, ribbon, or string, the length of which is equal to the required length of the garland. The number of parts for the garland in this project is good for a thread length around 1 yard (1 meter).
